Sprinkler System Leak Adjustment Policy

A written leak adjustment request must be made for each adjustment. Forms, furnished by the Department, shall be submitted stating the information required to process the request.

To qualify for a leak adjustment the sprinkler system water usage must be over a minimum of 10,000 cubic feet and the sprinkler system water usage shall be a minimum of 100 percent above the highest past usage.

Gallatin Public Utilities shall collect for the highest past usage (at current rates), and shall collect \$0.50 per 100 cubic feet for all usage above the highest past usage.

One leak adjustment per customer per year is permitted. A year shall be defined as a twelve (12) month period.

A leak adjustment can only be made on the billing for a one (1) month period. In the event a leak covers multiple billing periods, the higher bill of the months can be adjusted.
